XIRING TO PRESENT ITS CONNECTED SMART CARD READER 'TEO BY XIRING' AT THE WISTP'07 WORKSHOP

Suresnes, May 4th 2007 – XIRING, the security solutions provider for remote transactions, presents its latest connected smart card reader Teo by XIRING at the WISTP'07 Workshop held in Greece – May 8-11, 2007.

Teo by XIRING is a PC connected smart card reader compliant with the most advanced technical requirements (PC/SC, CCID, USB, EMV 2000, Microsoft Windows Vista certified) and provides high added value with a “plug'n'play” reader and three positions of use. This reader has been designed according to the strongest environment-friendly standards (no screws, easy recycling, and recycled cardboard packaging).

More than a just a smart card reader, Teo by XIRING is an innovative procurement solution built around a dedicated e-commerce platform (www.Teobyxiring.com). On this website, the users find a detailed presentation of the product and the procurement process defined in two steps: a Trial Kit for evaluation and validation purposes and 20-units packs. Users just need to create an account and follow a simple purchase process (available payment methods: credit cards, Paypal and bank transfer).

With this new channel, XIRING provides a simple and effective platform for software editors wishing to develop smart card-based applications. The fixed price per unit, regardless of the quantity, allows any size of business to deploy new smart card-based applications. Available 24/7, buyers can purchase products when they need it, without the need to manage stocks (measured lead-time for delivery is under one week).

About XIRING:

XIRING provides security solutions for remote transactions. The company develops security software embedded in smart card readers for strong authentication and digital signature, addressing two main markets: banking and healthcare. Created in 1998, the company posted € 12.8 million in revenues in 2006. XIRING has been listed on Alternext/Euronext PARIS since Sept. 18th, 2006.
